Oswego Saunders One-Wheel and Roller Pipe Cutter

Pipe cutters of the roller style are suitable only for work where the cutter can be revolved entirely around the pipe. It cuts the pipe without leaving a burr on the outside, and for this reason is preferred to the three-wheel cutter on open work.

This cutter has ample material in all sections and is strong and rigid. Every cutter is tested before leaving the factory and is guaranteed throughout.

PRICE LIST

Cutter No.	Code Word	List Price, Each	Cuts Pipe	Weight Each, Pounds	List Price, Dozen	Weight Wheels, Dozen	List Price, Dozen	Weight Pins, Dozen	List Price, Dozen	Blocks and Wheels, Each	Handle and Screw, Each

This cut illustrates style of Cutters Nos. 1 and 2, cutting pipe ½ to 2 inches in diameter

This cut illustrates style of Cutters Nos. 3 to 7, cutting pipe 1½ to 12 inches in diameter

Oswego Improved Barnes Pipe Cutter

Cutting Pipe from ½ to 12 inches in diameter

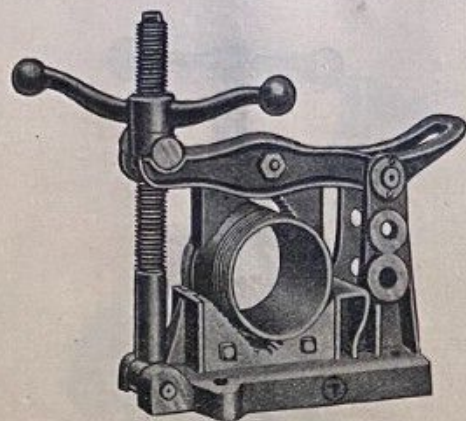

Where it is impossible to revolve the cutter entirely around the pipe, the three-wheel style of pipe cutter is especially adapted for the work. The wheels and pins are made from the best grade of crucible steel, accurately machined and tempered in oil to give additional toughness, and each one is tested.

The sliding block is of special solid construction and will not spread. Each cutter is tested for tracking and is guaranteed throughout.

Oswego Jarecki Pattern Vise

It will be seen by referring to the above cut of this vise that the beam which holds the upper jaw is hinged. By this improvement the pipe can be placed in the vise at any point. The side opening has other advantages; the vise may be used for holding pipe while fittings are screwed on one or both ends, or for taking apart old pipe work.

The parts of this vise interchange with the ORIGINAL JARECKI VISE.

Oswego Heavy Five-Inch Jaw Bench Vise

The vise is designed and built especially for the most severe and exacting work, which is required of a vise of this class in railroad, machine shops, mills and large manufacturing plants.

The parts of this vise are duplicates of and are interchangeable with parts of the ORIGINAL WALWORTH VISE.
